

Appendix M

ASSIGNED AREA and SIMPLEX RADIO FREQUENCIES

Appendix M.1 is a pdf with 4 pocket size charts

In a major disaster it may take hours to assess the damage to the Amateur Radio communications equipment we use daily. It will also take time for people to take care of themselves, their families and be available to establish the WKC ARES Nets.

LISTEN FIRST

The **Listen-Up Frequency is 146.520 Simplex** if major repeaters are not operating. This is the national simplex frequency and most hams have it preprogrammed into their mobile and hand held radios.

In Western Kern County we have Tactical Simplex "TAC" simplex frequencies for local geographic areas. An Area Control Station may be available on those geographic area simplex frequencies – depending on the situation.

Another option is **listening** on the Primary Repeater "PR" or Back-up Repeater "BUR" output frequency (No change to your radio. You won't be able to talk to anyone) but you may hear instructions about where to tune in order to get WKC ARES information or Check-In. You may also opt to program your radio to transmit on the output.

PUC	Group / Area	PR	BUR	TAC
	Greater Bakersfield			
	Oildale	145.150 (-) 100	147.270(+) 94.8	146.565
	North East Bak.	145.150 (-) 100	147.270(+) 94.8	147.540
	South East Bak.	145.150 (-) 100	147.270(+) 94.8	147.570
	South West Bak.	145.150 (-) 100	147.270(+) 94.8	146.415
